Professional Summary

Aspiring **Cybersecurity Professional & IAM Enthusiast** with a strong foundation in **Identity & Access Management (IAM), cybersecurity principles, and penetration testing**. Hands-on experience with **Burp Suite, OWASP Top 10, and security automation** through projects and self-learning. Passionate about **bug bounty hunting and ethical hacking**, eager to contribute to a security-driven organization.

Technical Skills

- **IAM & Access Control:** User provisioning, Role-Based Access Control (RBAC), Single Sign-On (SSO), Multi-Factor Authentication (MFA).
- **Cybersecurity Tools:** Burp Suite, OWASP ZAP, Metasploit, Wireshark.
- **Programming & Scripting:** Python, Bash.
- **Bug Bounty & Security Testing:** Web application security, Vulnerability assessment.
- **Cloud & Infrastructure:** AWS IAM, Active Directory, Linux security.

Practical Experience & Academic Projects

Tata Cybersecurity Security Analyst Job Simulation on Forage **- October 2024**

• Completed a job simulation involving identity and access management (IAM) for Tata Consultancy Services, collaborating with a Cybersecurity Consulting team.

• Acquired expertise in IAM principles, cybersecurity best practices, and strategic alignment with business objectives.

• Delivered comprehensive documentation and presentations, showcasing the ability to communicate complex technical concepts effectively.

Mastercard Cybersecurity virtual experience program on Forage **- October 2024**

• Completed a job simulation where I served as an analyst on Mastercard's Security Awareness Team

• Helped identify and report security threats such as phishing

• Analyzed and identified which areas of the business needed more robust security training and implemented training courses and procedures for those teams

Academic Minor Project

Share price Estimation Top 5 GPU companies using machine learning -December13,2023

Project Description:

The objective of this project is to estimate the share prices of the top 5 GPU companies in the market using historical data and current market trends. The aim is to develop a predictive model that can forecast the future prices of these companies based on their historical performance and other relevant factors. The model should take into consideration various economic indicators, industry trends, company financials, and other relevant data to make accurate predictions.

The analysis should be performed using statistical and machine learning/ Deep learning techniques and the results should be presented in a clear and concise manner. The final output of the project will be a report outlining the predicted share prices of the top 5 GPU companies in the market, along with an analysis of the factors that have contributed to their performance.

Academic Major Project

Auto Insurance Fraud Detection using machine learning -may 10,2024

Project Description:

Insurance are claimed in order to get a relief amount for any damage cause. Insurance is a means of protection from financial loss , but now-a-days Many people are claiming the Insurance by fraud claims. It can be called as a scam. It is called as fraud claim when a claimant attempts to obtain some benefit or advantage they are not entitled to, or when an insurer knowingly denies some benefit that is due.

These type of Insurance claims cause loss to the company. So, It is necessary to detect the claims which are fraud. The number of cases of insurance fraud that are detected is much lower than the number of acts that are actually committed. So themain purpose of the Insurance Fraud Detection system is to predict the Insurance claim is a Fraud or Legal Claim based on the different appeals and parameters.

Education

- Bachelor's in Computer Science | Vaagdevi Engineering College | 2024
- Intermediate Education | Narayana Junior College | 2020
- S.S.C | Little Flower High School | 2018

Certifications

- *Certificate of participation in a 15 days Ethical hacking program in SPYRO 3.O.*
- *Got certificate Cybersecurity Analyst job Simulation by TATA in forage.*
- *Got certificate Cybersecurity job Simulation by MASTERCARD in forage.*
- *Got certificate in AI – Data Scientist conducted by the APPC .*
